The Fifth Edition of A History of the Roman People continues to provide a comprehensive analytical survey of Roman history from its prehistoric roots in Italy and the wider Mediterranean world to the dissolution of the Roman Empire in Late Antiquity in A.D. 600. Clearly organized and highly readable, the text's narrative of major political and military events provides a chronological and conceptual framework for the social, economic, and cultural developments of the periods covered. Major topics are treated separately so that students can easily grasp key concepts and ideas.

Dramatic artist, natural scientist and philosopher, Plutarch is widely regarded as the most significant historian of his era, writing sharp and succinct accounts of the greatest politicians and statesman of the classical period. Taken from the Lives, a series of biographies spanning the Graeco-Roman age, this collection illuminates the twilight of the old Roman Republic from 157-43 bc. Whether describing the would-be dictators Marius and Sulla, the battle between Crassus and Spartacus, the death of political idealist Crato, Julius Caesar's harrowing triumph in Gaul or the eloquent oratory of Cicero, all offer a fascinating insight into an empire wracked by political divisions. Deeply influential on Shakespeare and many other later writers, they continue to fascinate today with their exploration of corruption, decadence and the struggle for ultimate power.

Most people know that there are 70 million Baby Boomers in America today...but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Greek and Roman warfare differed from other cultures and was unlike any other forms of warfare before and after. The key difference is often held to be that the Greeks and Romans practised a 'Western Way of War', where the aim is an open, decisive battle, won by courage instilled in part by discipline. Harry Sidebottom looks at how and why this 'Western Way of War' was constructed and maintained by the Greeks and Romans, why this concept is so popular and prevalent today, and at whether or not this is an accurate interpretation. All aspects of ancient warfare are thoroughly examined - from philosophy and strategy to the technical skills needed to fight. He looks at war in the wider context - how wars could shape classical society, and how the individual's identity could be constructed by war, for example the Christian soldier fighting in God's name. He also explores the ways in which ancient society thought about conflict: Can a war be just? Why was siege warfare particularly bloody? What role did divine intervention play in the outcome of a battle? Taking fascinating examples from the Iliad, Tacitus, and the Persian Wars, Sidebottom uses arresting anecdotes and striking visual images to show that the any understanding of ancient war is an ongoing process of interpretation. A look at the social and emotional lives, as well as communication methods, of dolphins.

Examining the remarkable life of Cornelia, famed as the epitome of virtue, fidelity and intelligence, Suzanne Dixon presents an in-depth study of the woman who perhaps represented the ideal of the Roman matrona more than any other. Studying her life during a period of political turmoil, Dixon examines Cornelia's attributes: daughter of Scipio Africanus, wife of an aristocrat, and mother of the Gracchi; and how these enabled her to move in high echelons of society. For students and scholars of classical studies and Roman history, this book will give students a glimpse into the life of Cornelia, and of the influence she had on the period.

How far should you go to make a profit? Infoquake, the debut novel by David Louis Edelman, takes speculative fiction into alien territory: the corporate boardroom of the far future. It's a stunning trip through the trenches of a technological war fought with product demos, press releases, and sales pitches. Natch is a master of bio/logics, the programming of the human body. He's clawed and scraped his way to the top of the bio/logics market using little more than his wits. Now his sudden notoriety has brought him to the attention of Margaret Surina, the owner of a mysterious new technology called MultiReal. Only by enlisting Natch's devious mind can Margaret keep MultiReal out of the hands of High Executive Len Borda and his ruthless armies. To fend off the intricate net of enemies closing in around him, Natch and his apprentices must accomplish the impossible. They must understand this strange new technology, run through the product development cycle, and prepare MultiReal for release to the public—all in three days. Meanwhile, hanging over everything is the specter of the infoquake, a lethal burst of energy that's disrupting the bio/logic networks and threatening to send the world crashing back into the Dark Ages. With Infoquake, David Louis Edelman has created a fully detailed world that's both as imaginative as Dune and as real as today's Wall Street Journal.

Romulus and Remus, the rape of Lucretia, Horatius at the bridge, the saga of Coriolanus, Cincinnatus called from his farm to save the state -- these and many more are stories which, immortalized by Livy in his history of early Rome, have become part of our cultural heritage. This new annotated translation includes maps and an index and is based on R. M Ogilvie's Oxford Classical text, the best to date. - ; the fates ordained the founding of this great city and the beginning of the world's mightiest empire, second only to the power of the gods' Romulus and Remus, the rape of Lucretia, Horatius at the bridge, the saga of Coriolanus, Cincinnatus called from his farm to save the state - these and many more are stories which, immortalised by Livy in his history of early Rome, have become part of our cultural heritage. The historian's huge work, written between 20 BC and AD 17, ran to 12 books, beginning with Rome's founding in 753 BC and coming down to Livy's own lifetime (9 BC). Books 1-5 cover the period from Rome's beginnings to her first great foreign conquest, the capture of the Etruscan city of Veii and, a few years later, to her first major defeat, the sack of the city by the Gauls in 390 BC. -

In March 1968, thousands of Chicano students walked out of their East Los Angeles high schools and middle schools to protest decades of inferior and discriminatory education in the so-called "Mexican Schools." During these historic walkouts, or "blowouts," the students were led by Sal Castro, a courageous and charismatic Mexican American teacher who encouraged the students to make their grievances public after school administrators and school board members failed to listen to them. The resulting blowouts sparked the beginning of the urban Chicano Movement of the late 1960s and early 1970s, the largest and most widespread civil rights protests by Mexican Americans in U.S. history. This fascinating testimonio, or oral history, transcribed and presented in Castro's voice by historian Mario T. Garcia, is a compelling, highly readable narrative of a young boy growing up in Los Angeles who made history by his leadership in the blowouts and in his career as a dedicated and committed teacher. Blowout! fills a major void in the history of the civil rights and Chicano movements of the 1960s, particularly the struggle for educational justice.
