Radio imaging is the term used to describe the sound effects and music, like voiceovers, jingles, music beds, and sweepers, designed to brand your station. Similar to visual branding elements, such as a logo, brand colors, etc., radio imaging is just the auditory elements that you can use to identify and individualize your station.

When you use Shazam to identify a song on the radio, the app picks the sample of the song and scans its database for a matching audio fingerprint. The sample, usually 10 seconds long, say from 0.10 – 0.20 seconds into the song, is enough to detect a match. Once a match is found, Shazam displays details of the song on your screen from its ...
