surreal collages and computer animations which trigger a wide range of intellectual and emotional responses. Diagrams tell stories. Those able to read them can follow the process by which ideas and thoughts take visual shape, find aesthetic form and, if all goes well, become part of the built environment.

Diagrams play an increasingly important role in architecture and urban planning helping to communicate both complex ideas and systems relationships in a way that is simple to understand across both linguistic and cultural barriers. With bold visions and unexpected approaches diagrams contribute significantly to complex construction development tasks and ultimately their successful implementation. Additionally they are also design objects that reflect the signature of their respective creator as a fresh and inspiring art form. This book, Volume 2 of Architectural and Program Diagrams from the series Construction and Design Manual showcases over 416 pages an almost endless variety of ideas and solutions around the topic of design and construction. It also includes an introductory essay on the importance of using diagrams in presenting architecture.

presentation of designs and ideas in the form of diagrams. This method of presentation is easy to understand when dealing with the client and can be communicated internationally, beyond language and cultural barriers – a product of our globalised world. However, diagrams are now much more than explanations and form their own discipline in creative professions connected to design and construction. What looks simple is in fact a complex matter. This title in the series Construction and Design Manual is in its second edition and assembles 384 pages of diagrams by avant-garde architects and designers who specialise in public space, landscape architecture and urban planning.

The classic programming guide for architects and clients-fully updated and revised. Architectural programming is a team effort that requires close cooperation between architects and their clients. Problem Seeking, Fourth Edition lays out a five-step procedure that teams can follow when programming any building or series of buildings, from a small house to a hospital complex. This simple yet comprehensive process encompasses the entire range of factors that influence the design of buildings.
