Solutions Manual For Automatic Control Systems [EBOOK]

In manual control system, the process operator observes the process condition and controls the system by doing manual adjustments. The Automatic control system uses any one of the continuous controller (P, PI, PID) to control the process based on the measurements and input. Example: Driving a car by yourself is manual control. Driverless Google car is an automatic control system. The manual control is very useful during emergencies, plant start up and plant shut down.
