~~Bills of lading advice—BIMCO~~

In response to this demand, BIMCO brought together a group of charterers and owners to develop a new clause for charter parties that specifically addresses the use of electronic bills of lading (paperless trading) systems. Bills of lading produced in electronic format are designed to replicate the purposes and processes (such as endorsements or reservations) of their paper equivalent so as to offer “functional equivalence”.

This book covers the subjects of break bulk cargo, general cargo and project cargo, and how these cargoes are shipped. It deals with the cargoes themselves, the vessels used for their carriage, and how the carriage is managed using the

Read Book Bills Of Lading Curriculum Bimco

process of vessel chartering. Alongside these, it also covers offshore vessel management and how offshore supply vessels are used to carry cargoes to offshore oil and gas installations. Break bulk cargo covers a wide variety of cargoes, from project cargo to more varied cargoes carried on an ad hoc basis, often between ports that are not equipped for container traffic. It also covers the carriage of specific cargoes that cannot fit inside or are unsuitable for containers. This includes the carriage of cargoes for major projects, and cargoes for the offshore sector, which is an area covered in a specific section in the book concerning the use of offshore supply vessels. To date, only minor elements of shipping books cover this kind of trade, hence the need for a new book that specifically covers this subject. The focus of this book is providing expert insights and detailed explanations of the practical issues related to all aspects of break bulk and general cargo management. The book is written for legal practitioners, shipping managers, managers of project cargo, oil and gas companies, shipping professionals, charterers, shipbrokers, shippers and anybody else involved in ad hoc vessel chartering for the carriage of break bulk, general and project cargoes. It will also serve as a valuable resource for students of shipping.

This essential handbook gives concise explanations of the myriad activities which encompasses shipping. The book covers documentation, types of ships and cargoes, organisations, freight charges and surcharges, contract forms and clauses, with all the relevant terms contained in logical sections, making it possible to see the terms in context. The second edition seeks to explain the history and progress of the European Commission's approach to competition in the liner and tramp trades. It also looks at security measures introduced since September 2001. By incorporating the book

Read Book Bills Of Lading Curriculum Bimco

“Freight Charges”, the book looks in particular at liner freight charges and surcharges in more depth.

This book, written in three parts, covers the basics of the international trade, financing and the legal framework related to the law of carriage of goods by sea, elaborates on bills of lading in depth and sea waybills and ship’s delivery orders in brief and charterparties in depth. While the book is based on the English law, cases and materials from other jurisdictions, particularly Singapore, Malaysia, India, the USA, and Australia are brought in to provide an international perspective. The practical analyses, commentary and critiques of cases would be a useful guide for practitioners in developing case arguments. Although written with practitioners, academicians and students in mind, the book will also serve as a useful guide for sea carriers, freight forwarders, international traders, financiers, etc. as the complex subject is presented in reader-friendly and easy to grasp manner.

This book analyses the impact of two vital and contemporary developments on shipping law and practice: disruptive technologies and climate change. It considers the impact of these new technologies, honing in on likely emerging issues and unresolved questions, especially about existing and potential private law liabilities and concentrates, from the point of view of English, EU and international law, on the legal implications of climate change and associated environmental risks in the shipping sector. Written by a contributor team drawn from the most experienced and knowledgeable academics and practitioners in shipping law, this treatment of these growing areas of practice will be of great use to lawyers and administrators across the world.

The Commercial Shipping Handbook is an invaluable reference tool for anyone involved in international trade and a first step towards understanding the framework within which the international movement of goods by sea is conducted. The handbook gives concise explanations of the many activities that comprise shipping, explaining the terms and how they interrelate. Areas covered include: Documents used in international transport by sea e.g. the bill of lading and the charter-party – what they contain, the different types and examples of each Generic types of ships, cargoes, containers and ports Details of all the major maritime associations prominent in contract drafting and policy making, together with a brief explanation of their objectives The many extra costs and surcharges found in shipping, particularly in liner shipping Chartering terms, an explanation of each and their context Clauses appearing in bills of lading, in voyage charters and time charters Technical elements of shipping as they relate to the commercial operation of ships, for example tides and draughts Examples of principal documents Discussing over 1250 commercial shipping terms, this book will be an essential reference for all shipowners, charterers, managers and brokers and will also be of use to legal, insurance and banking professionals.

This book consists of edited versions of the papers delivered at the Institute of International Shipping and Trade Law's 11th International Colloquium, held at Swansea Law School in September 2015. Featuring a team of contributors at the top of their profession, both in practice and academia, these papers have been carefully co-ordinated so as to ensure to give the reader a first class insight into the issues surrounding international sale and carriage contracts. The book is set out

Read Book Bills Of Lading Curriculum Bimco

in three parts: Part I offers a detailed and critical analysis on emerging issues and unresolved questions in international sales and the carriage contracts affected to facilitate such sales. Part II critically and thoroughly analyses the legal issues that often arise in the context of security over goods, letters of credit and similar documents. Part III is dedicated to a critical and up-to-date discussion on matters concerning cargo insurance in this context. With its breadth of coverage and high-quality analysis, this book is vital reading for both professional and academic readers with an interest in international trade and carriage of goods.

Forum selection is typically the most crucial issue in a transnational case. Nowhere is this truer than in maritime law, where forum selection is the first and sometimes the only point of engagement in international maritime litigation. In this important collection of essays, ten outstanding maritime law scholars from eight countries analyze the complex theoretical and practical issues surrounding forum selection in maritime cases. Among the topics discussed are the following: injunctions; forum shopping for limitation of liability; forum non conveniens; effect of forum selection clauses; loss or damage to goods; the in personam link; and, recognition of foreign liens. The book stems from a symposium held at Tulane University in 2004 to honor the 70th birthday of Robert Force, the influential and respected scholar who founded the renowned Tulane Maritime Law Center. As befits such a festschrift, the book opens with a detailed analysis and overview of forum selection clauses, written by Professor Force and his Tulane colleague Martin Davies. This is followed by thought-provoking essays on comparative issues, procedural theory, competing jurisdictions, jurisdictional clauses, EC law, and other matters, and by insightful and knowledgeable reports on specific issues related to China

and South Africa. At a moment in history when geopolitical trends and globalization of trade are rapidly growing and changing, maritime lawyers and the various agencies and commissions that sustain this vitally important branch of international legal practice will greatly appreciate this remarkable book.
