Sensory System

Principles. Sensation

begins with a stimulus;

All detection systems

have thresholds;

Psychophysics

File Type PDF

Chapter 6

systematically analyzes perception; Detection involves finding a signal in a background of noise; A stimulus that doesn't change is unimportant, so sensory systems ignore it; 6.2 Touch and Pain

Outline

Chapter 6: Sensation and Perception
sensation The detection of physical energy emitted or

File Type PDF

Chapter 6

reflected by physical objects; it occurs when energy in the external environment or the body stimulates receptors in the sense organs (eyes, ears, tongue, nose, skin and internal body tissues) Perception is the process by which sensory impulses are organized and interpreted.

Answers
Sensation and perception
are two separate
processes that are very
closely related. Sensation
is input about the
physical world obtained
by our sensory receptors,
and perception is the
process by which the
brain selects, organizes,
and interprets these

File Type PDF

Chapter 6

Sensation And Perception Study Guide Answers

from sensation in its emphasis upon the consciousness of objects, or things. Sensation, as we saw in the last chapter, is more appropriately conceived as concerned with the consciousness of qualities. The two processes have this in common, that both are produced by the stimulation of a sense organ.
