With its recent history of natural and man-made disasters, 21st-century America is constantly on heightened disaster alert. Less obvious is that between people's individual plans and large-scale government responses, the public health sector faces a daunting array of tasks to prepare for future events. *Disaster Preparedness: A Health Planning Approach*, sponsored by the AHPA, identifies and analyzes these tasks in terms of three distinct stages - pre-event (planning), during the crisis itself (response), and post-event (recovery) - offering a solid framework for providing effective services during traumatic times. An interdisciplinary panel of disaster planning experts and related agencies examines the current state of preparedness, reviews the health effects of disasters, illustrates core readiness skills (e.g., predicting needs, allocating resources, handling turf battles between competing interests), and provides salient examples of familiar and lesser-known events from the US and elsewhere. Among the topics covered: - Integrating hospitals into community disaster planning; - The roles of public health officials, communities, and social networks; - Creating and sustaining community-wide preparedness systems; - Mental illness and suicidality after Hurricane Katrina; - Disaster preparedness for the disabled, institutionalized patients, and other special populations; - Using electronic health records, predictive modeling, the Emergency Preparedness Resource Inventory, and other cutting-edge resources. This combined conceptual/practical focus gives *Disaster Preparedness: A Health Planning Approach* an immediate interest to community health planners and health care administrators, researchers and graduate students in public and community health, and policymakers.

U.S. policymakers have stepped up systematic disaster preparedness efforts sharply since the terrorist attacks of September 11, 2001, including the creation of the U.S. Department of Homeland Security and a plethora of federal initiatives. Against a backdrop of natural disasters that occur each year in the United States and heightened concern about pandemic influenza, there is an emerging national consensus that the best path is an all-hazards approach to disaster preparedness planning and that effective local planning is critical. Military installations and their civilian counterparts-local government and local health-care providers, especially the U.S. Department of Veterans Affairs-can strengthen local-level disaster preparedness planning. This report describes the prototype capabilities-based planning tool that RAND developed and the two prototype networking tools that RAND adapted to help local military and civilian planners collaborate in disaster preparedness.

Initial priorities for U.S. participation in the International Decade for Natural Disaster Reduction, declared by the United Nations, are contained in this volume. It focuses on seven issues: hazard and risk assessment; awareness and education; mitigation; preparedness for emergency response; recovery and reconstruction; prediction and warning; learning from disasters; and U.S. participation internationally. The committee presents its philosophy of calls for broad public and private participation to reduce the toll of disasters.

Emergency managers and officials have seen a tremendous increase in the planning responsibilities placed on their shoulders over the last decade. Crisis Management and Emergency Planning: Preparing for Today's Challenges supplies time-tested insights to help communities and organizations become better prepared to cope with natural and manmade disasters and their impacts on the areas they serve. Author and editor Michael J. Fagel, PhD, CEM has more than three decades of experience in emergency management and emergency operations. He has been an on-site responder to such disaster events as the Oklahoma City Bombing and the site of the World Trade Center in the aftermath of 9/11. He is an experienced professor, trainer, professional, and consultant and has pretty much seen it all. The book delves into this experience to present advanced emergency management and response concepts to disasters not often covered in other publications. It includes coverage of planning and preparedness, public health considerations, vulnerability and impact assessments, hospital management and planning, sporting venue emergency planning, and community preparedness including volunteer management. Contributions from leading professionals in the field focus on broad responses across the spectrum of public health, emergency management, and mass casualty situations. The book provides detailed, must-read planning and response instruction on a variety of events, identifying long-term solutions for situations where a community or organization must operate outside its normal daily operational windows. This book has been selected as the 2014 ASIS Book of the Year.
