This enhanced edition of Total Recall holds 16 videos clips, including behind the scenes footage from Terminator 3, political speeches from the Governor years and clips from Pumping Iron. In this fully illustrated ebook, Arnold Schwarzenegger takes us through each of the 170+ photographs and narrates each image. In his signature larger-than-life style, Arnold Schwarzenegger's Total Recall is a revealing self-portrait of his illustrious, controversial and truly unique life. Born in a small Austrian town in 1947, a year of famine, he was the son of an austere police chief. He dreamed of moving to America to become a bodybuilding champion and a movie star. By the age of 21, he was living in Los Angeles and had been crowned Mr Universe. Within five years, he had learned English and become the greatest bodybuilder in the world. Within ten years, he had earned his college degree and was a millionaire from his business enterprises in real estate, landscaping and bodybuilding. He was also the winner of a Golden Globe Award for his debut as a dramatic actor in Stay Hungry. But that was only the beginning. The Terminator spawned numerous sequels and made him one of Hollywood's biggest stars, as he had a series of hit films including Predator, Total Recall, True Lies and Twins. He married Maria Shriver, becoming part of the Kennedy clan, while going on to become the Republican governor of California, where he led the state through a budget crisis, natural disasters and political turmoil. It is the greatest immigrant success story of our time. His story is unique, and uniquely entertaining, and he tells it brilliantly in these pages. Until now, he has never told the full story of his life, in his own voice. Here is Arnold, with total recall.

In *Typeset in the Future*, blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into *2001: A Space Odyssey*, *Star Trek: The Motion Picture*, *Alien*, *Blade Runner*, *Total Recall*, *WALL-E*, and *Moon*, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (*Star Trek*), Paul Verhoeven (*Total Recall*), and Ralph Eggleston and Craig Foster (Pixar). *Typeset in the Future* is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.
