introduces viable treatment alternatives, assessment tools, and new ways of understanding self-destructive behavior using a strengths-based approach that distinguishes between the "experimental" non-

suicidal self-injury (NSSI) that some teenagers occasionally engage in and the self-destructive behaviors that are repetitive and chronic. In the new edition, many of the treatment strategies are

# Access Free Family Pact Super Bill

cross referenced to a useful workbook, giving therapists and clients concrete ways to integrate theory into practice. In addition, Ferentz emphasizes the importance of assessing for and strengthening clients'

# Access Free Family Pact Super Bill

self-compassion, and explains how nurturing this idea cognitively, emotionally, and somatically can become the catalyst for motivation and change. The book also explores a cycle of behavior that clinicians

can personalize and use as a template for treatment. In its final sections, the book focuses on counter-transferential responses and the different ways in which therapists can work with self-destructive behaviors
