**NATIONAL BESTSELLER** • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller  *Guitar Zero*  At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Let's Talk! uniquely combines modern communicative pedagogy with SmartClass+ digital interactive, multimedia technology. Explains the rudiments of German grammar and provides vocabulary exercises for self-study.

What is psychology? When did it begin? Where did it come from? How does psychology compare with related subjects such as psychiatry and psychotherapy? To what extent is it scientific? Introducing Psychology answers all these questions and more, explaining what the subject has been in the past and what it is now. The main "schools" of thought and the sections within psychology are described, including Introspection, Biopsychology, Psychoanalysis, Behaviourism, Comparative (Animal) Psychology, Cognitive Approaches (including the Gestalt movement), Social Psychology, Developmental Psychology and Humanism. The key figures covered include: Freud, Pavlov, Skinner, Bandura, Piaget, Bowlby, Maslow and Rogers, as well as many lesser-known but important psychologists.

Ideal as a graduate textbook, this title is aimed at helping design effective biomaterials, taking into account the complex interactions that occur at the interface when a synthetic material is inserted into a living system. Surface reactivity, biochemistry, substrates, cleaning, preparation, and coatings are presented, with numerous case studies and applications throughout. Highlights include: Starts with concepts and works up to real-life applications such as implantable devices, medical devices, prosthetics, and drug delivery technology. Addresses surface reactivity, requirements for surface coating, cleaning and preparation techniques, and characterization. Discusses the biological response to coatings. Addresses biomaterial-tissue interaction. Incorporates nanomechanical properties and processing strategies.

For all those who have struggled to learn German in the past. For all those who think they're just not a linguist. For all those who don't have the time -- or the inclination -- to sit and study a textbook. This is your chance to have a one-to-one lesson from Paul and his native-speaking German expert, Katharina, and all in your own time. Download the course to your MP3 player and within a few hours you will have learned over 6,000 German words. Importantly, you will also know how to make your new vocabulary work for you. No set phrases, no lists of vocabulary. Just real German at your fingertips. Each course includes: 12 CDs holding over 12 hours of audio an 80-page booklet a DVD demonstrating Paul's method
