MCQs in Clinical Pharmacy is an invaluable study aid for those preparing for multiple choice questions in clinical pharmacy. Questions in this textbook are practice-oriented and are intended to assess students' knowledge of clinical issues, evaluative and analytical skills, and ability to apply their knowledge in clinical practice. Topics covered include:

This book provides 300 practice MCQs divided into three practice papers. Correct answers follow, accompanied by short referenced notes drawing from recent important journal articles, major critical care textbooks and selected internet resources. Since there is no other dedicated intensive care MCQ book on the market, this book is relevant to the following groups: junior intensive care trainees, senior intensive care nursing staff wishing to enhance their medical knowledge, intensive care consultants as a teaching aid and trainees preparing for professional examinations. This MCQ book will also be ideal in preparation for the European Diploma in Intensive Care Medicine (EDIC) Part 1 examination, as the questions are matched as closely as possible in style and difficulty to those in the EDIC Part 1. The EDIC is an internationally recognised qualification for medical trainees in intensive care, set by the European Society for Intensive Care Medicine (ESICM). It is a two-part examination consisting of a 100-question multiple choice paper (Part 1) and a clinical and viva voce examination (Part 2). To ensure relevance, the questions are designed with reference to the training syllabus provided by the ESICM.

There are very few radiology multiple choice question books on the market that reflect the current trends and developments in the field of imaging. Hence, the emphasis of this book is on cross-sectional CT and MR imaging. It highlights the current understanding and concepts in the state-of-the-art imaging of a wide range of diseases in the body. The multiple choice questions are organised according to body systems and imaging modalities. There are twelve sections in the book, testing the reader in a broad range of imaging knowledge. The questions are accompanied by expanded answers, which provide the reader with a summary of the key facts relating to a particular topic. This is especially useful in assisting the reader in consolidating his or her understanding of the subject. The questions are devised in a format similar to those encountered in the Part 2A examination of the Royal College of Radiologists (UK) and the Part 2 examinations of the Joint Australian and New Zealand College of Radiology. Candidates taking the American Radiology
