Monitoring and Evaluation

In most cases an M&E system refers to all the indicators, tools and processes that you will use to measure if a program has been implemented according to the plan (monitoring) and is having the desired result (evaluation). An M&E system is often described in a document called an M&E plan. An M&E framework is one part of that plan.

and future management of outputs, outcomes and impact. Monitoring is a continuous assessment of programmes based on early detailed information on the progress or delay of the ongoing assessed activities. An evaluation is an examination concerning the relevance, effectiveness, efficiency and impact of activ

Monitoring and evaluation - Wikipedia

In many organisations, “monitoring and evaluation” is something that that is seen as a donor requirement rather than a management tool. Donors are certainly entitled to know whether their money is being properly spent, and whether it is being well spent.

Monitoring and Evaluation - Civicus

Monitoring data is only useful if it is analysed and used to improve programme quality and quickly address any problems that emerge. The Monitoring and Evaluation Coordinator must ensure that all monitoring data collected is analysed and presented in a timely and user-friendly way. In doing so, the quality of information should also be considered.

This Handbook provides a comprehensive ten-step model that will help
guide development practitioners through the process of designing and
building a results-based monitoring and evaluation system.

In 1997, New York City adopted a mammoth watershed agreement to
protect its drinking water and avoid filtration of its large upstate
surface water supply. Shortly thereafter, the NRC began an analysis of
the agreement's scientific validity. The resulting book finds New York
City's watershed agreement to be a good template for proactive
watershed management that, if properly implemented, will maintain high
water quality. However, it cautions that the agreement is not a
guarantee of permanent filtration avoidance because of changing
regulations, uncertainties regarding pollution sources, advances in
treatment technologies, and natural variations in watershed

Access Free Monitoring Evaluation A Management Tool

conditions. The book recommends that New York City place its highest priority on pathogenic microorganisms in the watershed and direct its resources toward improving methods for detecting pathogens, understanding pathogen transport and fate, and demonstrating that best management practices will remove pathogens. Other recommendations, which are broadly applicable to surface water supplies across the country, target buffer zones, stormwater management, water quality monitoring, and effluent trading.

This manual explains the skills and steps for making a monitoring and evaluation system that functions well, organizing the people, processes and partnerships so that they collect and use good information that can be used by decision makers and other stakeholders.

This volume has been developed as a step-by-step guide for professionals involved in designing, implementing, monitoring and evaluating developmental interventions. It introduces and elucidates the key concepts and procedures involved, starting from the fundamentals of project design and management, the basics of monitoring and evaluation, and the development of a performance monitoring plan to different approaches to monitoring, choosing

Access Free Monitoring Evaluation A Management Tool

appropriate evaluation designs, approaches to evaluation, the analysis of monitoring and evaluation, and finally implementing this information in a project environment. In order to provide further context, the manual uses real project examples which help in buttressing the understanding of the readers and enable adoption of these practices in such projects.

This open access book is a consolidation of lessons learnt and experiences gathered from our efforts to utilise Earth observation (EO) science and applications to address environmental challenges in the Hindu Kush Himalayan region. It includes a complete package of knowledge on service life cycles including multi-disciplinary topics and practically tested applications for the HKH. It comprises 19 chapters drawing from a decade's worth of experience gleaned over the course of our implementation of SERVIR-HKH - a joint initiative of NASA, USAID, and ICIMOD - to build capacity on using EO and geospatial technology for effective decision making in the region. The book highlights SERVIR's approaches to the design and delivery of information services - in agriculture and food security; land cover and land use change, and ecosystems; water resources and hydro-climatic disasters; and weather and climate services. It also touches upon multidisciplinary topics such as service planning; gender

Access Free Monitoring Evaluation A Management Tool

integration; user engagement; capacity building; communication; and monitoring, evaluation, and learning. We hope that this book will be a good reference document for professionals and practitioners working in remote sensing, geographic information systems, regional and spatial sciences, climate change, ecosystems, and environmental analysis. Furthermore, we are hopeful that policymakers, academics, and other informed audiences working in sustainable development and evaluation – beyond the wider SERVIR network and well as within it – will greatly benefit from what we share here on our applications, case studies, and documentation across cross-cutting topics.

This volume offers a simple, systematic guide to creating a knowledge sharing practice in your organization. It shows how to build the enabling environment and develop the skills needed to capture and share knowledge gained from operational experiences to improve performance and scale-up successes. Its recommendations are grounded on the insights gained from the past seven years of collaboration between the World Bank and its clients around the world—ministries and national agencies operating in various sectors—who are working to strengthen their operations through robust knowledge sharing. While informed by the academic literature on knowledge management and organizational learning, this handbook's operational background and

Access Free Monitoring Evaluation A Management Tool

many real-world examples and tips provide a missing, practical foundation for public sector officials in developing countries and for development practitioners. However, though written with a public sector audience in mind, the overall concepts and approaches will also hold true for most organizations in the private sector and the developed world.

This open access book provides an overview of the building blocks necessary for managing, steering and guiding the establishment of a research infrastructure (RI). It offers valuable insights into RI investment, access and management at the academic, grants management, agency and policy level, and serves as a useful guide for the research community, students, and those in the private sector wishing to understand the approaches and opportunities involved in the establishment, maintenance and management of research infrastructure platforms. Presenting a holistic view of RI investment and granting cycles from a South African perspective, the books target audience includes those working in science diplomacy, policymaking and science grants councils (especially in Africa) as well as funders and donors.

This 'Handbook on Planning, Monitoring and Evaluating for Development Results' is an updated edition of the 2002 edition of 'Handbook on Monitoring and Evaluation for Results'. It seeks to address new directions in planning, monitoring and evaluation in the context of the United Nations Development Programme (UNDP) corporate strategic plan, the requirements of the UNDP evaluation policy approved by the Executive Board in 2006 and the United Nations Evaluation Group (UNEG) 'Standards for Evaluation in the UN System'. The updated Handbook also incorporates information recommended by key users of the Handbook during various workshops held by UNDP units.
