A compelling design, research focus, and an engaging narrative defines

Sociology: Compass for a New Social World. The renowned author team shows students how thinking sociologically can help them draw connections between themselves and the social world. Sociological concepts are clearly connected to students' interests and experiences by taking universal and popular elements of contemporary culture and rendering them sociologically relevant. This text devotes more space than others do to drawing connections between objectivity and subjectivity in research, presenting a more realistic, and therefore more exciting, account of how sociologists practise their craft. Tables and graphs are not simply referred to, they are analyzed. Some theories are rejected, while others are endorsed. The author team brings depth to issues of diversity and globalization using personal and research experiences.

Sociology in Today's World explores why sociology is important and relevant to everyday life. It teaches students how to think sociologically, not just what to think, and shows how sociology can help us make sense of our lives. It comprehensively covers key aspects and current issues in Australian and New Zealand society, whilst emphasising the importance of diversity and a global perspective.

Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

This revised and updated second edition includes an analysis of the results of the 2011 and 2015 federal elections as well as an in-depth discussion of the

“Harper Dynasty.”
