The wavelength of yellow light waves is. Convert in to meters.. Substitute for and for in the equation.. Thus, the wavelength of micro waves is.. The thickness of the paper is 0.003 in. Convert into meters.. As the wavelength of yellow light is, the number of waves in the length of is calculated as follows:. Thus, the distance (d) traveled by 131 waves is 131 times the wave length of the microwave.

The 4th edition had hardly any example problems throughout the entire text. The author remedied this in the 5th edition. There are multiple example problems that are well discussed in each chapter on the main topics. Also, the text was reorganized a bit and of course the page numbers and homework problems are a little different than the 4th edition.
