Travel nursing is a great way to make a living while traveling around the United States, but the path to mobile healthcare is cluttered with fear and apprehension. People are scared that they are not going to get that elusive first assignment. People don't understand bill rates, VMSs, MSPs, cancellations or contract negotiations. Then you have the tax laws which really send people into a tailspin. It is just not right that nurses have to go into the world of travel nursing with blinders. Kay started travel nursing 15 years ago when there was one book out and two forums, and three websites for information. Times have changed, and so has the information world. Today there is grundle of websites to help travelers out, but how do you know which ones will give you reliable and trustworthy information. Kay has spent the last ten years teaching recruiters what travelers want in a company and teaching travelers what they should expect while out on the road. She is a leader in this industry and a vital member of the travel nursing community. Whether you're an experienced or a newbie traveler, this is the most

comprehensive book on travel healthcare. Epstein not only teaches on the basics of finding great assignments but goes further into explaining the travel company structure, the art of negotiating contracts, compact states, the Joint Commission, NATHO, BKAT testing and PBDS testing. This is the only book series that has full chapters on Allied Health and LPN/LVN travel along with traveling with pets, homeschooling, and traveling in an RV. Again this year we will have a chapter on working and volunteering in foreign countries by Aaron Highfill, and Joseph Smith brings you the most updated Travel Tax information. Since 2007 every edition of Highway Hypodermics (the book) has gone to #1 on Amazon, beating out other books published by such names as including Mosby, Lippincott, the American Heart Association, and Tabers. Don't find your self-spinning around confused. Get this book and find out how we provide the roadmap for today's traveling nurse. Take the fear out of trying to get your travel healthcare career on the road.

Now is a critical time in pediatric informatics. As information technologies—electronic health records (EHRs), personal health records (PHRs), computerized physician order entry (CPOE)—and standards (HL7) are developed to improve the quality of health care, it is imperative for policy makers and pediatricians to be aware of their impact on pediatric care and child health. Informed child advocates must be at the planning table as national and regional health information networks are developed to insure the unique health care needs of children are being met. *Pediatric Informatics: Computer Applications in Child Health* is a current digest of the important trends in pediatric informatics, written by leading experts in the field. This book explores how the management of biomedical data, information, and knowledge can optimize and advance child health. The contributors investigate the specific importance of pediatric informatics is derived from the biological, psychological, social and cultural needs that distinguish children from other populations. These distinctions create complexities in the management of pediatric data and information that make children a vulnerable population and require the development of a new body of knowledge in pediatric informatics.

The #1 NEW YORK TIMES Bestseller The basis for the PBS Ken Burns Documentary *The Gene: An Intimate History* From the Pulitzer Prize-winning author of *The Emperor of All Maladies*—a fascinating history of the gene and “a magisterial account of how human minds have laboriously, ingeniously picked apart what makes us tick” (Elle). "Sid Mukherjee has the uncanny ability to bring together science, history, and the future in a way that is

understandable and riveting, guiding us through both time and the mystery of life itself." —Ken Burns "Dr. Siddhartha Mukherjee dazzled readers with his Pulitzer Prize-winning *The Emperor of All Maladies* in 2010. That achievement was evidently just a warm-up for his virtuoso performance in *The Gene: An Intimate History*, in which he braids science, history, and memoir into an epic with all the range and biblical thunder of *Paradise Lost*" (*The New York Times*). In this biography Mukherjee brings to life the quest to understand human heredity and its surprising influence on our lives, personalities, identities, fates, and choices. "Mukherjee expresses abstract intellectual ideas through emotional stories...[and] swaddles his medical rigor with rhapsodic tenderness, surprising vulnerability, and occasional flashes of pure poetry" (*The Washington Post*). Throughout, the story of Mukherjee's own family—with its tragic and bewildering history of mental illness—reminds us of the questions that hang over our ability to translate the science of genetics from the laboratory to the real world. In riveting and dramatic prose, he describes the centuries of research and experimentation—from Aristotle and Pythagoras to Mendel and Darwin, from Boveri and Morgan to Crick, Watson and Franklin, all the way through the revolutionary twenty-first century innovators who mapped the human genome. "A fascinating and often sobering history of how humans came to understand the roles of genes in making us who we are—and what our manipulation of those genes might mean for our future" (*Milwaukee Journal-Sentinel*), *The Gene* is the revelatory and magisterial history of a scientific idea coming to life, the most crucial science of our time, intimately explained by a master. "The Gene is a book we all should read" (*USA TODAY*).

This three-volume collection, titled *Enterprise Information Systems: Concepts, Methodologies, Tools and Applications*, provides a complete assessment of the latest developments in enterprise information systems research, including development, design, and emerging methodologies. Experts in the field cover all aspects of enterprise resource planning (ERP), e-commerce, and organizational, social and technological implications of enterprise information systems.

The need for competency-based education (CBE) in nursing has been recognized for years. CBE provides a way to help ensure that learners are competent at the end of educational endeavors. This book is designed as a resource for nurse educators who are responsible for diverse education programs. Authors Anema and McCoy bring together all the elements of CBE, and provide a road map to develop, implement, and evaluate competency-based approaches to nursing education. The book provides valuable guidelines for developing organizational strategies, new care delivery approaches, and project planning tools. Guidance on performance assessment tools and data collection is also included. Key features: Explains why CBE is needed and how it can help improve current education programs Presents practical guidelines on how to transition to the CBE approach Provides helpful guidance on developing valid and reliable assessments Includes critical information on data collection and the use of data to verify achievement of outcomes Contains practice activities at the end of each chapter to simulate real-life situations

Draping—the art of using cotton muslin to create womenswear directly on a dress form—is an essential skill for fashion designers. Through a series of step-by-step projects, designed to develop skills from the most basic to more advanced techniques, this book will guide you in creating both classic and contemporary garments, as well as historical styles and costumes. Draping projects include dresses, bustiers, and jackets, and highlight key fashion garments such as Audrey Hepburn's dress from *Breakfast at Tiffany's* and the Dolce & Gabbana tuxedo jacket. Starting with the basics of choosing and preparing the dress form for draping, the book advances through pinning, trimming, and clipping, and creating shape using darts and tucks, to

adding volume using pleats and gathers, and handling complex curves. Advanced skills include how to use support elements such as shoulder pads, under layers, and petticoats, and how to handle bias draping. The book culminates with a chapter on improvisational skills. Each skill and technique throughout the book is explained with step-by-step photographs and line drawings that bring the art of creating womenswear in three dimensions to life.

Pediatric Neurology for the Oral Boards: A Case-Based Review is the first pediatric neurology review book written specifically for neurology residents preparing for the oral boards. The book presents sixty cases with discussions structured according to the neurology oral boards format: localization of neurologic findings; differential diagnosis and most likely diagnosis; diagnostic workup; and patient management. The cases will help readers lay a foundation of knowledge in pediatric neurology and develop an organized approach to clinical decision-making. An introduction explains in detail what to expect on the examination and gives helpful hints on preparing for and taking the exam.

This book contains articles presented at the 12th International Conference on Cerebral Vasospasm, held in Lucerne, Switzerland, in July 2013. The included papers represent a balanced cross-section of the enormous progress achieved in basic and clinical research on aneurysmal subarachnoid hemorrhage and its sequelae, including early neurovascular events and delayed cerebral vasospasm. The section on basic research covers a broad range of aspects, with a special focus on animal models for the study of acute events after experimental subarachnoid hemorrhage. The section on clinical topics encompasses imaging and endovascular management, surgical innovations and techniques, management and monitoring in neurocritical care, the status of clinical trials, and factors involved in aneurysm formation. This edition is of interest not only for basic researchers but also for clinicians who wish to apply state-of-the-art knowledge to the research and management of this devastating condition.
