NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.

Written by experienced author Mike Benn, this Student Guide for Physics:

- Identifies the key content you need to know with a concise summary of topics examined in the A-level specifications
- Enables you to measure your understanding with exam tips and knowledge check questions, with answers at the end of the guide
- Helps you to improve your exam technique with sample answers to exam-style questions
- Develops your independent learning skills with content you can use for further study and research

This book was written by experienced practitioners for an increasingly popular course. It includes actual examination questions giving students plenty of practice to help develop exam technique. It also includes ICT activities for full support in developing statistics in this media. This book is fully differentiated to provide for all course and coursework requirements for Foundation and Higher Tiers. Review sections in every chapter are ideal for revision and consolidation of learning.

This book features papers addressing a broad range of topics including psychology, religious studies, natural heritage, accounting, business, communication, education and sustainable development. It serves as a platform for disseminating research findings by academicians of local, regional and global prominence, and acts as a catalyst to inspire positive innovations in the development of the region. It is also a significant point of reference for academicians and students. This collection of selected social sciences papers is based on the theme “ Soaring Towards Research Excellence ” , presented at the Regional Conference of Sciences, Technology and Social Sciences (RCSTSS 2016), organised bi-annually by Universiti Teknologi MARA Cawangan Pahang, Malaysia.
