A good scope statement will answer the following six questions: Why - the general aims and objectives (purpose) of the research. What - the subject to be investigated, and the included variables. Where - the location or setting of the study, i.e. where the data will be gathered and to which entity the data will belong.

1 Answer to this question. Answer: The scope of a study explains the extent to which the research area will be explored in the work and specifies the parameters within the study will be operating. Basically, this means that you will have to define what the study is going to cover and what it is focusing on. Similarly, you also have to define what the study is not going to cover.

[How do I present the scope of my study? | Editage Insights](#)
The scope of study refers to the parameters under which the study will be operating(Marilyn & Goes, 2013). The problem that the researcher seeks to resolve will fit within certain parameters. The researcher needs to make it as clear as possible what will be studied and what factors are within the accepted range of the study.
