~~Study Guide For Respiratory System Biology 11~~

Definition: The respiratory system (also referred to as the ventilator system) is a complex biological system comprised of several organs that facilitate the inhalation and exhalation of oxygen and carbon dioxide in living organisms (or, in other words, breathing). Most of the organs of the respiratory system help to distribute air, but only the tiny, grape-like alveoli and the alveolar ducts are responsible for actual gas exchange.

~~Respiratory System (Anatomy) Mrblog~~

one of the several blood-group antigens carried on the surface of red blood cells. respiratory system. a collection of organs whose primary function is to take in oxygen and expel carbon dioxide; the organs of this system include the lungs, the throat, and the passageways that lead to the lungs. external respiration.
