Often the finest artists do not make the best teachers. Many frustrated college students of art know this all too well as they suffer through unstructured classes with inexperienced teachers or graduate student instructors. In these situations, it is easy to blame the teachers. But the problem is largely institutional: most students graduating with MFAs from art schools receive little if any instruction in teaching art. If you find yourself in this predicament as teacher or student, this book is for you. The first book to provide a

comprehensive guide for teaching college-level art, *The Art of Teaching Art* is the culmination of respected artist and instructor Deborah Rockman's two decades of teaching experience. Believing that drawing is the backbone of all of the visual arts, she begins with a complete explanation of drawing concepts that apply to any subject matter, e.g., composition, sighting processes, scaling techniques, and methods for linear and tonal development. She then illustrates these concepts with step-by-step methods that easily translate to

classroom exercises. Next, she applies the drawing principles to every artist's most important and challenging subject, the human figure. After an extended section on understanding and teaching perspective that explores illusionistic form and space, the focus of the book shifts to the studio classroom itself and the essential elements that go into making an effective learning environment and curriculum. From preparing materials lists and syllabi, to setting up still-lives, handling difficult classroom situations, critiquing and grading student artworks,

care for themselves and others, providers are increasingly unable to meet the demand through existing systems and mental health care approaches. In *Managing Uncertainty in Mental Health Care*, Drs. Patricia Rockman and José Silveira critically examine core assumptions informing the primary approaches currently used to assess mental illness in clinical settings, with an emphasis on clinician certainty. They illustrate how current diagnostic frameworks obscure clinician uncertainty while encouraging overconfidence and go on to consider potential strategies for

lessening the impact of inevitable errors.

Ultimately, this book makes a case for acknowledging the fallibility of clinical judgment, independent of competence and experience, and the need to modify approaches to mental health care so that they align with the irreducible uncertainty of the domain. By exploring emerging transdiagnostic approaches to mental health care in terms of their alignment with irreducible uncertainty, Rockman and Silveira make space for error and offer clinicians a novel way to advance the fundamental aim of mental health care: to reduce the
