~~Sharepoint Document Update Metadata Checkout File Type~~

If you want to update a file's metadata, you have to construct an endpoint that reaches the file as a list item. You can do this because each folder is also a list, and each file is also a list item. Construct an endpoint that looks like this: `https:// {site_url} /_api/web/lists/getbytitle('Documents')/items({item_id})` .

~~Working with folders and files with REST | Microsoft Docs~~

And as long as you have **Contribute** access within the library, you can update the metadata by clicking the check box next to a file name, going to the ribbon and clicking **File** tab > **Edit properties**.
