Guide Mixtures And Solutions

It is a mixture because mixtures

are two or more ingredients

mixed together. Salt and water

are two ingredients. It's a solution

because the salt dissolves and

the water stays clear. All solutions

are mixtures. Define 'dissolving'.

The sample contains a mixture of small rocks, sand, and silt (very fine soil) from the creek by the school. Students are divided into four groups and asked to predict how the samples will settle. Each of the four groups was given a clear, glass jar with the mixture. Each group predicted the order in which the materials in the mixture would settle.

(Solicit answers like: salt water, mud pies, bubbles, etc.) Solutions are types of mixtures, but mixtures can also be heterogeneous, where you can see the different ingredients separated out. Refer to the associated activity Messin' with Mixtures for students to further their understanding by investigating a heterogeneous mixture as environmental engineers analyzing a soil sample, using trail mix.

*Mixtures And Solutions Study
Guide - galileoplatforms.com*

Chemistry is the study of the structure of matter and the changes or transformations that take place within those structures. The Mixtures and Solutions Module introduces students to the properties, behaviors, and changes in substances—fundamental ideas in chemistry. Students also develop models to explain how something works.
