Research on the international transfer of technology in economics and management literature has primarily focused on the role of countries and that of companies, in particular multinational enterprises (MNEs). Similarly, economic and business historians have tended to view international technology transfer as a way for economically "backward" countries to acquire new technologies in order to catch up with more developed economies. This volume provides a more in-depth understanding of how the international transfer of technologies is organized and, in particular, challenges the core-periphery model that is still dominant in the extant literature. By looking beyond national systems of innovation, and statistics on

foreign trade, patent registration and foreign direct investment, the book sheds more light on the variety of actors involved in the transfer process (including engineers, entrepreneurs, governments, public bodies, firms, etc.) and on how they make use of a broad set of national and international institutions facilitating technology transfer. Put differently, the volume offers a better understanding of the complexity of global technology flows by examining the role and actions of the different actors involved. By bringing together a number of original case studies covering many different countries over the period from the late 19th to the 21st century, the book demonstrates how technology is being transferred through complex processes, involving a variety of actors from several countries using the national and international institutional frameworks.

From humble beginnings as a 1970s motoring show, Top Gear has gone on to achieve diesel-powered world domination. After Clarkson and producer Andy Wilman successfully pitched a new format to BBC bosses, Top Gear returned to become the irreverent, funny and often controversial show we now know and love. The Star in a Reasonably Priced Car, the Cool Wall and Power Laps by the mysterious Stig have all become staples of Britain's favourite Sunday evening entertainment. Recent series have been defined by their madcap challenges such as driving across Africa in clapped-out bangers - with predictably hilarious

results. However, the show's most shocking moment came in 2006, when Hammond suffered serious head injuries while driving a Vampire turbojet drag racing car at over 300mph. Clarkson, Hammond and May; they are the politically-incorrect-joking, stone-washed-denim-wearing, bloke-hero trio for the modern(ish) age. This brilliant, detailed book is fitting tribute to the show, its presenters and its most memorable moments.

When a Mumbai mob boss and terrorist, who deals in guns, drugs, prostitution, poaching and gambling, threatens to bring his war to the American streets, Mack Bolan must flush him out of hiding and send him running for the hills of Pakistan. Original.
