Author Adrienne Lobel discusses The Frogs and Toads All Sang, a book started by her late father, Arnold Lobel.

**The Frogs and Toads All Sang - YouTube**

Frogs have smooth, moist skin and long, stripy legs and are likely to be found in damp habitats in the garden. Toads have warty skin, golden eyes and prefer to crawl rather than hop; if threatened a toad can puff itself up to appear bigger. Toads can tolerate drier habitats than frogs and spend less time in water.

**Frogs & toads: identification**

Warty frog species tend to be called toads, but the distinction between frogs and toads is informal, not from taxonomy or evolutionary history. All toads are frogs, but not all frogs are toads. An adult frog has a stout body, protruding eyes, anteriorly-attached tongue, limbs folded underneath, and no tail (except in tailed frogs).
