How does memory work? Are we addicted to television? What is Alzheimer's Disease? Can machines read our minds? The human brain, with all its inherent complexity, has taken on near mythical status. Its 100 billion nerve cells, forged by nature and refined over millions of years, allow humans the capacity to survive, create culture, love. Once an impenetrable grey mass, modern science is getting to grips with our brains at an unprecedented rate. We are moving from a time of anatomy, in which science did well to characterise the various regions of the brain, to a time in which we can observe thought processes in real time. We have entered a neural renaissance. The Rough Guide to the Brain is for anyone who's ever wanted to know more about how their brain and mind works - and what goes wrong when it doesn't. From how we evolved such an impressive organ to how it achieves the feat that is you. Including numerous insights from leaders in their fields, there's no better way to stimulate your grey matter.

Explores commonly-held myths of the brain through the lens of scientific research, backing up claims with studies and other evidence from the literature Looks at enduring myths such as "Do we only use 10% of our brain?", "Pregnant women lose their mind", "Right-brained people are more creative" and many more

From cognitive neuroscientist Dr. Christian Jarrett, a fascinating book exploring the science of personality and how we can change ourselves for the better. What if you could exploit the plasticity of personality to change yourself in specific ways? Would you choose to become less neurotic? More self-disciplined? Less shy? Until now, we've been told that we're stuck with the personality we were born with. The introvert will never break out of their shell, the narcissist will be forever trapped gazing into the mirror. In Be Who You Want, Dr. Christian Jarrett takes us on a thrilling journey, as he not only explores the ways that life changes us, but shows how we can deliberately shape our personalities to influence the course of our lives. Dr. Jarrett draws on the latest research to provide evidence-based ways to change each of the main five personality traits, including how to become more emotionally stable, extraverted, and open-minded. Dr. Jarrett features compelling stories of people who have achieved profound personality change such as a gang-leader turned youth role model, a drug addict turned ultra-runner, and a cripplingly shy teenager turned Hollywood mega-star. He also delves into the upsides of the so-called Dark Triad of personality traits—narcissism, Machiavellianism, and psychopathy—and how we might exploit their advantages without ourselves going over to the dark side. Filled with quizzes and interactive exercises to help us better understand the various aspects of our personalities, life stories, and passions, Be Who You Want will appeal to anyone who has ever felt constrained by how they've been characterized and wants to pursue lasting change.

The Rough Guide to True Crime is the complete compilation of crime's most notorious villains, heinous acts and shocking misdemeanors. The Rough Guide to True Crime in a new ePub format provides an unusually wide coverage of crime's most appalling occurrences; combining in-depth accounts of the most infamous to the lesser known crimes, from comnen to cyber crime, with 'at-a-glance' fact files throughout. From the Moors murders and Harold Shipman, to the murder of Tupac, this guide illuminates the psychology in play behind the most intriguing crimes in history, from the absurd to the appalling. Written by award-winning journalist and author Cathy Scott, the book features extensive black and white still photographs and profile boxes by forensic expert Professor Louis B. Schlesinger explaining the psychology of serial killers, hit men, burglars and various types of murderers. Lesser violations provide a lighter touch, including Paris Hilton's traffic transgressions and Winona Ryder's shoplifting fetish. The Rough Guide to True Crime explores the best of the haunting genre of True Crime, thrilling the armchair voyeur and amateur criminologist alike.

The key ideas in Psychology explained, with colour illustrations, in half a minute. Pavlov's Dogs, Psychoanalysis, Milgram's Obedience Study, and Beck's Cognitive Therapy? Sure, you know what they all mean. That is, you've certainly heard of them. But do you know enough about these psychology theories to join a dinner party debate or dazzle the bar with your knowledge? 30-Second Psychology takes the top 50 strands of thinking in this fascinating field, and explains them to the general reader in half a minute, using nothing more than two pages, 300 words, and one picture. The inner workings of the human mind will suddenly seem a lot more fun, and along the way we meet many of the luminaries in the field, including William James, Aaron Beck, and (of course) Sigmund Freud. From Behaviorism to Cognitivism, what better way to get a handle on your inner demons?
