Firearms are not the only, or even the primary, example of decisive imperial technology. In fact, Headrick identifies 19th century imperialism as an early example of an information society, and claims that information (and organization) rather than machines comprised the decisive technological advantage.

guaranteed success. Power over Peoples examines Western imperialism's complex relationship with technology, from the first Portuguese ships that ventured down the coast of Africa in the 1430s to America's conflicts in the Middle East today. Why did the sailing vessels that gave the Portuguese a century-long advantage in the Indian Ocean fail to overcome Muslim galleys in the Red Sea? Why were the same weapons and methods that the Spanish used to conquer Mexico and Peru ineffective in Chile and Africa? Why didn't America's overwhelming air power assure success in Iraq and Afghanistan? In Power over Peoples, Daniel Headrick traces the evolution of Western technologies—from muskets and galleons to jet planes and smart bombs—and sheds light on the environmental and social factors that have brought

victory in some cases and unforeseen defeat in others. He shows how superior technology translates into greater power over nature and sometimes even other peoples, yet how technological superiority is no guarantee of success in imperialist ventures—because the technology only delivers results in a specific environment, or because the society being attacked responds in unexpected ways. Breathtaking in scope, *Power over Peoples* is a revealing history of technological innovation, its promise and limitations, and its central role in the rise and fall of empire.
