directly to his downfall. Students would do well to read this book before venturing forth into a large firm, a small firm, or any pressure-cooker environment." -Nancy Rapoport, University of Houston Law Center "Eat What You Kill is gripping and well written. . . . It weaves in academic commentary and understanding of professional ethics issues in a way that makes it accessible to everyone." -Frank Partnoy, University of San Diego Law School He had it all, and then he lost it. But why did he do it, risking everything-wealth, success, livelihood, freedom, and the security of family? Eat What You Kill is the story of John Gellene, a rising star and bankruptcy partner at one of Wall Street's most venerable law firms. But when Gellene became entangled in a web of conflicting corporate and legal interests involving one of his clients, he was eventually charged with making false statements, indicted, found guilty of a federal crime, and sentenced to prison.

Milton C. Regan Jr. uses Gellene's case to prove that such conflicting interests are now disturbingly commonplace in the world of American corporate finance. Combining a journalist's eye with sharp psychological insight, Regan spins Gellene's story into a gripping drama of fundamental tensions in modern-day corporate practice and describes in perfect miniature the inexorable confluence of the interests of American corporations and their legal counselors. This confluence may seem natural enough, but because these law firms serve many masters-corporations, venture capitalists, shareholder groups-it has paradoxically led to deep, pervasive conflicts of interest. *Eat What You Kill* gives us the story of a man trapped in this labyrinth, and reveals the individual and systemic factors that contributed to Gellene's demise.

on the relationship between national policies, regional integration patterns and the wider global setting. It covers regional patterns in Europe, Asia and the Americas. Individual chapters focus on topics ranging from industrial or financial policies to social welfare regimes, as well as broader assessments and comparisons of regional arrangements in a global context. The chapters point to the diversity of regional patterns in the world economy and the continuing importance of national regulatory structures, yet they also point to the common pressures of globalisation felt by all, especially in the domain of capital markets. With broad coverage and clear but sophisticated analysis this new book will be vital reading to all those seeking to clarify their understanding of the contemporary regional/global paradox.

construct, police and redefine their boundaries. Focusing on the newly emerging large multinationals, it explores the relationship between professions, the economy and the state.

Increasingly, the challenge of management is to create and supply knowledge in order to sustain organizational performance. However, few books on management strategy have been written using this concept as a foundation. This unique volume adopts a knowledge-based approach that will complement and perhaps supplant other perspectives. Editors Nick Bontis and Chun Wei Choo look at the literature through the lens of strategic management and from the vantage point of organizational science. The thirty readings have been carefully selected and commissioned to provide the best literature available--from articles newly written for this book and from existing

Shows how international lawyers make non-law (extra-legal, illegal and other non-legal phenomena) and why this matters in global politics today.

In recent years, international business disputes have increasingly been resolved through private arbitration. This book details how an elite group of transnational lawyers constructed an autonomous legal field that has given them a central and powerful role in the global marketplace.

This book explores recent theoretical and empirical advances in the understanding of how professional occupations are organized.

Focusing in particular on the differences between established and emerging forms of expert work, the authors provide unique theoretical perspectives on this rapidly developing field.

This book relates the stories and describes the memorials of the people buried in Shelby, North Carolina's historic Sunset Cemetery, a microcosm of the Southeastern United States. The authors, an academic and a journalist, detail the lives and memories of people who are buried here, from Civil War soldiers to those who created the Jim Crow South and promoted the narrative of the Lost Cause. Featured are authors W.J. Cash and Thomas Dixon, whose racist novel was the basis for *The Birth of a Nation*. Drawn from historical research and local memory, it includes the tales of musicians Don Gibson and Bobby "Pepper Head" London, as well as a paratrooper who died in

the Battle of the Bulge and other ordinary folks who rest in the cemetery. A bigger responsibility is to give a voice to the silenced, enslaved people of color buried in unmarked graves. Cemeteries are sacred places where artistry and memory meet--to understand, we need both the tales and the tombstones.
