Remove loose debris and overhanging limbs to allow proper air-flow. Schedule seasonal maintenance. Have your air conditioner and furnace checked out before each heating and cooling season to catch problems before it is too late. Change filters regularly. A dirty filter can severely lower your HVAC system's performance.

Ultimate Guide to HVAC Systems |
Trane® HVAC | Owners Support
For your indoor air handler, try to wipe away any buildup of dust on the coil and change the air filter often. Your filters may be clogged or dirty. Clean or replace the filters. Consult your local Trane Comfort Specialist if you are

Online Library Trane Troubleshooting Guide

unsure where the filters are located.

Air Conditioner Troubleshooting - Trane

Over time, dust and dirt will build up on the filter screen. Try changing the air filters. There could also be a blockage in your air ducts. If this is the case, you'll need your local Trane Comfort Specialist to inspect the ductwork.

Gas Furnaces Troubleshooting - Trane

If it seems like your Trane furnace just isn't heating your home as effectively as you want, then the culprit might be a lack of airflow,
