Aug 8·13 min read. Photo by Franck V.on Unsplash. In my last article on Trust in AI, I wrote about how building trust in AI needs to include both 1) the people and institutions behind the technology and AI (those selling, making, using it) and 2) the technology of AI systems and solutions. But before we run off and collectively open shop for the “trust” business or lay out a blueprint and start coding trust into our behavior or our technology, let’s take the time to understand trust.

Initiative is a forum for interdisciplinary research from Cambridge and beyond to explore the dynamics of trust and distrust in relation to internet technologies, society and power. It is unique in considering the interplays and feedback loops between the fundamentals of technology, societal impact and governance of next generation systems at the research and development stage.

## Trust & Technology Initiative

Trust and technology: in tech we trust – for now Protectionism, anti-globalization, increasing citizen dissatisfaction, the voices of populism and the erosion of trust in all areas of business and society. As a sector, technology, enjoys the highest level of trust with 76% – but trust can be lost fast and the warning signs are clear

Trust and technology: in tech we trust - for now

Trust and Technology in a Ubiquitous Modern Environment: Theoretical and Methodological Perspectives provides a variety of theoretical perspectives on the topics of trust and technology, as well as some empirical investigations into the trust-building, trust-maintenance, and trust-destroying practices in the context of technology. It presents research positioned at the intersection of the ...

necessarily on people. For that reason trust, not technology, is what makes or breaks transformation in manufacturing. John Sobel is co-founder and CEO for Sight Machine.

## Trust Is More Important than Technology in Digital ...

When NGOs serve as the introduction point for new technology and establish a relationship of trust, they can propel technology adoption among the populations they serve. The role of trust is particularly important when dealing with the unbanked. Convincing a person to change the way they manage their money often requires a high level of trust.

## Trust and Technology (SSIR)

The Reuters Institute Digital News Report suggests that in the UK there is declining trust that either government or the technology companies will act in the public interest. A well-established tactic of information warfare is to sap morale by continuous attrition through the propagation of misinformation.

## Truth, Trust and Technology – so what's the problem ...

Trust in technology has been declining for several years and is highlighted by one significant data point: What can we trust is real? Seventy-six percent worry that “false information or fake news being used as a weapon” was agreed to 76 percent of the time – that’s a 6 percent jump since 2018. In the current climate the
