The VW Beetle is one of the best-loved of all classic cars, with many thousands preserved across the world, many in regular use. Over the years countless changes were introduced, together making a mid sixties Beetle, for instance, very different from one built in the mid-50s, or mid-70s, despite the obvious similarities. With the aid of hundreds of full colour photographs this new edition in paperback documents all the Beetle's specification changes and model differences during the classic period 1949-67, making it possible to determine the original specification and fittings of any Beetle from this period.Uses the same format as for the highly successful VW Transporter spec guides. Aimed at early-Beetle owners and enthusiasts. Superbly illustrated with 300 colour photographs. New edition in paperback for 2018.

Every Haynes manual is based on a complete teardown and rebuild, contains hundreds of "hands-on" photos tied to step-by-step instructions, and is thorough enough to help anyone from a do-it-your-selfer to a professional.
