he believed existed somewhere outside himself. Behind the Numbers chronicles a journey born in the ruins of addiction and spiritual paralysis and rises from the ashes toward redemption through determination and forgiveness. Beginning as a journal documenting the ongoing process of healing and spiritual transformation and concluding as a guide that takes a unique and relevant approach to Numerology, Behind the Numbers offers a unique approach towards Numerology that expands ones understanding of this amazing philosophy. Behind the Numbers takes a unique approach towards numerology by identifying numbers as 'filters' that channel the characteristics of the individual, as well as their Fate and Destiny. Rather than definitive indicators of the individual's limitations or abilities, Behind the Numbers releases such expectations and approaches this ancient philosophy from an entirely new perspective that is accessible as it is profound.

The companion to the hit CBS crime series Numb3rs presents the fascinating way mathematics is used to fight real-life crime Using the popular CBS prime-time TV crime series Numb3rs as a springboard, Keith Devlin (known to millions of NPR listeners as the Math Guy on NPR's Weekend Edition with Scott Simon) and Gary Lorden (the principal math advisor to Numb3rs) explain real-life mathematical techniques used by the FBI and other law enforcement agencies to catch and convict criminals. From forensics to counterterrorism, the Riemann hypothesis to image enhancement, solving murders to beating casinos, Devlin and Lorden present compelling cases that illustrate how advanced mathematics can be used in state-of-the-art criminal investigations.

Once Upon a Time, Storytelling Met Instructional Design From children to adults, everybody likes a good story. Stories are memorable, actionable, and emotional. We are constantly making sense of the world by forming stories, and that makes them perfect for instructional design. Instructional Story Design is a practical guide to writing and developing stories for training. It takes what you already know about a story's power to connect with people and offers a clear methodology for the otherwise daunting process of creating a compelling story. Master story designer Rance Greene shares his powerful yet familiar process to discover, design, and deliver instructional stories. He presents the two essential elements that must be present to tell a story for training: relatable characters and strong conflict. These elements create a desire for resolution and grab learners' attention. This book offers advice for unearthing the root of the performance problem, creating action lists for learners, and convincing stakeholders about the effectiveness of stories. Case studies from household companies such as Pizza Hut, Southwest Airlines, and PepsiCo show story design in action. Job aids and resources include an audience profile questionnaire, character description worksheet, storyboard template, and tips for developing stories using graphics, audio, and video. With this book, you'll:

- Sharpen your analysis skills to discover potential training stories.
- Design relatable stories that concretely connect with learning objectives.
- Easily develop captivating stories with tools you already own.
- Plan your next steps to implement your instructional story.

provides a holistic understanding of leadership in the police, identifying factors that inhibit and promote learning. It refers to four main components as dynamic and continuously evolving processes: Strategies: social mission and organisation, along with strategies as practice Community: organisational and police culture, identity and belonging, community of practice and competencies Participation: sense-making and discretion; power and politics Activities: learning as practice, change and change management as practice Practical and enriched with case studies, examples and best practice, the textbook is also rigorously research based. Authored by a professor of business and management with specialist knowledge in police leadership, it brings the cutting edge of leadership thinking to the practicalities of policing. It is essential reading for those engaged with policing, leadership roles, and management.

Latest version: May 2010. Careers are shortening and lives are lengthening - how can we keep our careers going as long as we do? In a global market of decreasing product and industry life cycles, and increasing competition, two powerful forces are pulling in opposite directions: the need to extend our careers to fund our growing longevity is set against the aspirations of a bulge of 1960s baby boomers to fill a shrinking number of management positions. This book takes a wry, detached look at the global commercial and demographic forces driving our emerging career patterns, and proposes what we should do now.
