Windows Server
Update Services,
previously known as
Software Update
Services, is a
computer program

Online Library
Windows Server
and network services
developed by
Microsoft Corporation
that enables
administrators to
manage the
distribution of updates
and hotfixes released
for Microsoft products
to computers in a
corporate
environment. WSUS
downloads these
updates from the

Online Library
Windows Server
Update Services
Microsoft Update
website and then
distributes them to
computers on a
network. WSUS is an
integral component of
Windows Server.
